

Nationwide Installation & Service

We cover everything from design, deployment, and management of single site installations to national rollouts.

With more than 10 years of experience, Pacific West Business offers comprehensive installation services delivered by a network of over 5,000 expert technicians, 500+ certified electricians, and highly experienced project managers. Together they successfully deploy POS, digital signage, menu boards, traffic counters, kiosks, drive-thru systems, VoIP, wireless networks, SD-WAN, and much more for clients of all sizes.

Since 2008, Pacific West Business has been installing point of sale (POS) systems for a wide variety of retailers located across the nation. From quick service restaurants to high-end retailers, Pacific West Business has the experience and national network of technicians and electricians to professionally manage and execute POS installations on a scale. Get your site locations POS systems up fast and generate revenue with Pacific West Business as your partner.

Pacific West Business project managers, engineers, and national network of professional IT technicians have extensive experience installing a wide range of area networks. Whether you need to connect an array of IoT devices to a local area network or connect multisite locations to a software-defined wide area network, Pacific West Business can install the network systems that deliver your company's critical information.

The Pacific West Business process for estimating network projects is to first review the project's blueprints, the scope of work, location(s), and desired timeframe. Then, Pacific West Business will conduct a site visit to discover cable paths, and any other information needed to formulate an accurate installation cost estimate.
