

Smart911®

Smart 911 is a free service that allows you to create a safety profile that first responders can access during emergencies.

Personal Safety Profile:

Users can create a secure profile that includes information such as medical conditions, disabilities, emergency contacts, and functional needs.

This data can be automatically sent to dispatchers when a 911 call is made.

It is safe and secure.

Increased Awareness:

Families can include details about pets, preferred medical facilities, and even potential hazards at their home.

Stay informed of weather, traffic, and other emergencies in your community.

Enhanced Response:

By providing dispatchers with vital information beforehand, responders can prepare and allocate resources for your access & functional needs more effectively.

Knowing that first responders will have access to your information can offer reassurance.
