API integration partners

Desspos is committed to bringing the best solutions

SwiftPOS API allows many third party online web store to easily integrate with SwiftPOS. We offer already established integration partners including:

Mobi2Go builds responsive, food delivery focused websites for all kinds of Restaurants and Cafes. With fully customisable website and menu options, it is the one stop shop for online food stores.

123Tix is a build custom websites and ecommerce stores that integrate directly to Swiftpos. Full integration of products, stock quantity, pictures as well as sending the transaction directly to swiftpos so there is only one central system for management.

Media Marketing Group, similar to Chromatix looks at your individual needs as a business and will build an online store to meet those needs. Everything from geo-store locations to click and collect. A seamless experience for your customers.

Chromatix is a company that uses WooCommerce (a leading online store platform) to build online stores such as liquor stores that fully connect to SwiftPOS.

WooCommerce Is the world leader in delivering online store platforms for all kinds of business. With easy customisation and API integration, WooCommerce will allow you to easily manage your online store.

SwiftPOS is also compatible with:
