

Hullett Marsh 2022 Water Levels

Compared to 2021 levels

(Based on water DUC structure settings and the summer drought of 2022)

- As always **preseason scouting trips** on foot or in a canoe/kayak will help you find **access routes** to pools based on current water levels
- **Successful** waterfowl hunters **scout** many times throughout the year to determine what areas **birds are using**
- Water level adjustments are governed by **Ducks Unlimited Canada (DUC)**
- **Major rain events will raise the water/dry periods will evaporate water**
- November and December will see levels rising

Zone A Pools	2021	2022
Bluebill	Low	Lower
Bluewing	High	Lower
Butterball	Average	Lower
Mallard	Average	Average
Whistler	Average	Lower
Pintail	Average	Average

Zone B Major Pools:

- The **Woodie Pool** is average depth
- Repairs made to the **Greenwing Pool** dyke have resulted in great water levels with fresh new vegetative growth and new waterfowl habitat! This pool had very little water for many years.
