

Dear Valued Customer,

You have probably heard about the changes coming January 1, 2021 from CMS regarding new guidelines for E&M Coding and what level office visit you can bill for in what circumstance.

We strongly recommend reading up on those changes here:

<https://www.ama-assn.org/topics/cpt-evaluation-and-management-em-codes>

Please follow that up with reviewing the document we have created specific to the software programs we support that you may have installed in your office, as they each have some changes that need to be made. You can find that document on <https://www.unifimdalerts.com/> on the front page in red labeled E & M Changes 2021.

Please reach out to support after reviewing the website and the CHS document if you still need assistance with making those changes.

Thank you and Happy Holidays,
The CHS Support Team
