

Atlanta Thrashers Patrik Stefan 2002-03 game used skates, size unknown.

These Nike Quest 1 skates had a revolutionary new construction that provided immediate fit and performance that was engineered to mirror the shape of the foot for the ultimate in control and support. The boots are constructed of FITPOSITE™ with compression molded Phylon™ quarters. They have a Grip-Fit™ lining with a tactile finish designed to provide a secure fit. The outsole consists of V12 Speed Wrap™ with TUUK® Custom+ perforated stainless steel blades and Zoom Air toe cap. Other features include the Dynamic-Fit™ Lacing System with water-resistant laces engineered for a secure fit without loosening during play and designed to wrap the boot around the foot for better fit. Based on photographs, these were worn by Patrik Stefan during the 2002-03 season, which coincides with the skate's release date. The size could not be determined but labels bearing the name STEFAN are affixed to the bottom of each skate. I acquired these from another collector, who purchased them at a used equipment sale open to Thrashers season ticket holders.
