It's Dash's Birthday, until Lars, the dad of the bullies is poisoned and another killer is on the loose. He is blackmailed into helping by Nina. But this time the mystery is far harder. NASA observes all the items sent into space, and the chances that huge parts of NASA are corrupt is low. There is no poison, no space, and almost everyone is a suspect as no one liked Lars. This is the hardest mystery yet.

Waste of Space is the best book in the series, with a satisfying end to the series. I would recommend this entire series as a whole to all people. It's packed with action, and a lot of fun to read. It is a fun book with some funny moments and I would recommend this to all. The ending is a twist, and the mystery is an intriguing one. It's also fun to try and follow along and solve the mystery with Dash.

Same as the first 2 books, anyone over 4th grade should be good to read this book. A dedicated reader could finish the entire series in 2 weeks. There is nothing graphic, sexual, just the occasional potty humor and such.
