*Angels and Demons* was a fantastic book. The non-stop action and the mystery like suspense made the book really pop out from any of the other books I have read so far. It is the second book of the Da Vinci Code series, but it is the prequel of the Da Vinci Code. It is about the same main character, Robert Langdon, who is a professor at the Harvard University. But this time he is trying to find out the mystery of the Illuminati.

This book was so amazing because Dan Brown spent so much time explaining the scenes and characters bringing out as much as he can from the surrounding environment, which made it very easy to imagine in your head. Dan Brown also created a very twisted ending that surprises the reader and makes the book last in your head for a long time.

I would recommend this book to anyone high school age or older who wants a good book full of suspense, mystery, and action.
