If you are a huge fan of *Divergent* by Veronica Roth, This is a must read. It had just as much action as *Divergent* except for the fact that the enemies in this book were zombies. In a sense it was a combination of *Divergent* and the *Maze Runner*. It is a two part series, in which this is the first and is followed by *outpost*, a book that is just as good, if not better. *Enclave* starts out with the main character, Deuce living in her underground colony called College. She was then exiled into the topside after a serious incident that wasn't her fault. How will she survive the plague ridden and zombie infested land?

This book deserves a 9 out of 10 because of what a great book it is. It has a continuous story line with a lot of action and details. It was the kind of book that you would pick up and put down after you're done reading it. I felt that it was meant for a high school level reader and above because of all the gory action that occurred at some scenes. Over all it was a fantastic read and would definitely recommend it. If you ever see this book anywhere, pick it up and start reading.
