This amazing novel is written by the famous author of the *Percy Jackson and the Lightning Thief* series. Like the *Percy Jackson* series, this book relates to ancient mythology, but Egyptian this time. The book takes place in modern times, and the main characters are two teenage siblings. After their mother's mysterious death, they have been separated and they only meet occasionally. On one of these visits, their father takes them to a museum with the Rosetta Stone, and the children witness something weird. Their father, surrounded by bright lights, is trapped inside a golden coffin that sinks into the ground and a man of fire appears.

They do not know that it is their first encounter with magic, but there are more to come. They learn about their family's past and discover talents of their own. However, they are being hunted down by Set, an evil god (the fiery man) and they also encounter monsters and helpful gods.

This book is amazing. I really like Rick Riordan's style of writing because it is humorous, interesting, and action-packed. I would recommend buying this book and it is recommended for anyone who has the ability to read it. Along with this book, I would recommend the next books of the series and the *Percy Jackson* books.
