LIBRARY COLLECTION

Report totals by library. System totals will automatically populate. If there is an error in a system total, check each location entry for error. If there is only an administrative total and the number cannot be separated by branch, report the data with the administrative location totals and report A/T for all branch locations. "Physical Units" refer to items in a fixed, physical format. For example, Audio Materials - Physical Units refers to physical audio books, physical CDs and any other Physical Audio Recording. "Print Materials" refers to print books, serials, gov docs, and any other print acquisition. For eAudio and eVideo, include only items purchased by the library and that have a set circulation period. Do not include items that do not have a return date, or are permanently retained by the patron. Other/Specialty Items must be items that 'circulate' and must be able to leave the building with the patron. Do not report in-house use only items under Other/Specialty.
