SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Eye contact Rinse immediately (the exposed eyes) with lukewarm, gently flowing water for at least 15-20

minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation

persists: Get immediate medical advice/attention.

Skin contact Wash immediately with soap and plenty of water. Rinse for at least 15 minutes. Remove

contaminated clothing and wash it before reuse. If skin irritation or rash occurs: Get medical

advice/attention.

Ingestion Drink immediately a small amount of water or milk. Then call a Poison Control Center or

doctor/physician right away. Do not induce vomiting unless instructed by poison control or a

medical professional.

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. If

breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get immediate

medical advice/attention.

4.2 Most important symptoms and effects both acute and delayed

Acute Eyes: Symptoms may include burns or irritation to the eyes.

Skin: Repeated or prolonged contact may cause dryness, cracking and dermatitis.

Inhalation: Symptoms may include irritation to the respiratory tract.

Ingestion: Symptoms may include burns or irritation of the gastrointestinal tract. Contact

with stomach acid can liberate toxic hydrogen sulfide vapors.

Delayed No known chronic effects.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Flammable properties

National Fire Protection Association (NFPA) Ratings

Health 2 Flammability 0 Reactivity 1 Special -

HAZARD RATING: 4 SEVERE 3 SERIOUS 2 MODERATE 1 SLIGHT 0 MINIMAL

5.2 Suitable extinguishing media

Use firefighting measures that suit the environment.

5.3 Unsuitable extinguishing media

No restrictions known.

5.4 Specific hazards arising from the substance or mixture

Closed/sealed containers may rupture violently when heated. In a fire, the following hazardous materials may be generated: hydrogen sulfide (H2S) gas.

5.5 Protective equipment or precautions for firefighters

Firefighters should wear self-contained breathing apparatus (SCBA) and full firefighting turnout gear. Keep containers and storage vessels in the fire area cooled with water spray.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions

Wear protective equipment specified in Section 8. Isolate the release area and deny entry to unnecessary personnel.

6.2 Environmental precautions

Avoid release to the environment – if this is not the intended use. Dike spills and stop leakage where practical.

6.3 Methods and materials for containment and cleaning up

Small releases Use absorbent material to collect and contain for salvage or disposal. Clean surface

thoroughly to remove residual spill.

Large releases Shut off release if safe to do so. Dike spill area with earth, sand or other inert absorbents to

prevent runoff into surface waterways or drains. Recover as much of the released product as possible, using portable pump and hoses, and place into container(s) for later disposal.

Following product recovery, flush area with water.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Wear suitable protective clothing, gloves and eye/face protection. Use only in a well ventilated area. Avoid contact with skin and eyes. Avoid prolonged or repeated breathing of vapors. Wash skin thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

Store in well ventilated area and away from combustibles, acids and oxidizing agents. Keep away from heat. Keep containers tightly closed and store out of direct sunlight at a moderate temperature.

SECTION 8: EXPOSURE CONTROL/PERSONAL PROTECTION

8.1 Occupational exposure limits

No exposure limits noted.

8.2 Engineering controls

Good ventilation should be used. Ventilation rates should be matched to site conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below reccommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station where material is frequently handled.

8.3 Personal protection measures

Eye Protection

Wear chemical goggles/full face shield. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

Skin Protection

Wear neoprene rubber gloves and chemical protection suit to prevent repeated or prolonged contact with material. Use protective clothing tested and approved under appropriate government standards such as NIOSH (US) or Directive 89/686/EEC (EU).

Respiratory Protection Have self-contained breathing apparatus (SCBA) positive pressure, available in case of accidental release, equipment failure or other unforeseen incidents. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or EN 166 EU.

General Hygiene Considerations

Wash thoroughly after handling and before eating, drinking or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
