

Press Release: New Hire – Joseph Griffin
Last Updated: 5/26/2022

FOR IMMEDIATE RELEASE

Civilworks New England Hires Joseph Griffin as Professional Engineer

Civilworks New England LLC is excited to announce its recent hire of Joseph Griffin, who joins the Civilworks team as a professional engineer and project manager working from the Dover office. He brings a wide knowledge in civil design including hydrologic and hydraulic modeling.

Joseph Griffin, PE has a Bachelor of Science in Civil Engineering from University of New Hampshire. He has 19 years of experience in the field of civil/environmental engineering. And 16 years of that time included experience in site civil design with expertise in hydrologic and hydraulic modeling in support of site/civil project permitting. The last 13 years of Mr. Griffin's experience has been at Portsmouth Naval Shipyard (concurrently with private consulting). His experience includes managing and permitting environmental programs and managing a team of environmental experts in:

- Clean Water Act program management and permitting of MS4, MSGP, and NPDES permits.
- Resource Conservation and Recovery Act program management and permitting of a licensed commercial TSD
- Management of the Environmental Emergency Response Team and the associated Integrated Contingency Plan

For more information, please contact owner Stephen Haight at 603-749-0443 or via the website's contact page at www.civilworksne.com.

Civilworks New England has been providing professional consulting services since 1989 to a diverse clientele of private developers, corporate clients, architects, engineers and contractors. Civilworks offers a wide variety of services in many areas including permitting, construction, storm water pollution prevention planning, coastal and waterfront infrastructure, etc. "We look forward to helping you with your next project!"
