Sketches of the incident

The area of the incident in Mt Vernon, Missouri

Mrs and Mr. Watson were puzzled by bright silver flashes coming from a pasture across the road from their farmhouse. Grabbing a pair of binoculars they were startled to see two small silver suited humanoids that appeared to be “running” their hands over a black cow that was lying on its side, not moving. The small beings moved their hands in odd jerky movements and suddenly the cow rose straight up and floated

with the beings into a silvery cone-shaped object on the ground nearby. The object's surface was like a mirror and reflected everything around it. Standing by a ramp on the object was a tall reptilian figure that had glaring eyes slit by vertical pupils resembling a snake. Standing on the other side of the craft was a taller and heavier hairy creature resembling a Bigfoot type being, that also had vertical yellow slits in round green eyes. As soon as the being entered the object with the black cow, it disappeared.

Reliability evaluation:
