Sketch of one of the alleged humanoids

Three anonymous witnesses (“a well known gynecologist” a doctor of Caracas of high social rank, an industrialist of high social rank and another industrialist of high social rank), saw a yellow luminous disc about 50 ft in diameter descend and hover over the ground 100 ft away. Then a shaft of light was projected downwards from its bottom, and in this shaft two “men” 7-8 ft tall, with shoulder length blond hair, descended to the ground; they wore seamless one-piece coveralls that appeared metallic. These beings approached the witnesses, telling them telepathically not to be afraid. The gynecologist asked them a number of questions to which they replied; they said (for example) that they came from Orion and that robots piloted some of their ships.

They came from Orion, on a Peace mission, to study the psyche of Men for "adaptation to their species." There are, in addition to Earth, seven inhabited planets: two are Saturn satellites named Epsilon and Kristofix, the others are Kelpis, Orion and a planet of Ursa Minor.

Flying Saucers are not Flying Saucers, but Gravitelides. They function by means of "a core of concentrated solar energy,

producing a powerful magnetic force." Some are piloted by Spacitomeles, others by Mekanisoteles, terms explained as follows: Spacitomeles are beings of outer space and Mekanisoteles are mechanical automate... etc. etc. (*)

Reliability evaluation:

- false/prank/hoax -

too many important details missing; no evidences;

total invention; no credibility;

(Orion is not a planet but a constellation;

Kristofix, the so-called planet, is a polish first name);

(*) many other details are inconsistent
