

SUMMER 2005 – WHARTON TEXAS

From Ronald Nussbeck's website *UFODIGEST*:

On October 2, 2009, this website posted three web pages headlined "UFO Photographed By World's Leading Imaging Scientist Reveals Extraterrestrials", signed Ronald Nussbeck.

The article claimed that Ron S. Stewart, inventor and imaging scientist, traveled east in Texas on Highway 59 towards Wharton in the late summer of 2005, as usual with a Fujica model ST-605 35 mm-camera using SLR type film and a Hanimex 200 mm telephoto lens, as photography is his passion.

The Sun was just setting, there was a storm looming overhead, when he noticed a bright flashing red and white light in the midst of a large dark black cloud just over head. He pulled his car to the side of the road, climbed out with his camera, because he knew it was "not a jet or a plane" since "it" stood perfectly still in the sky.

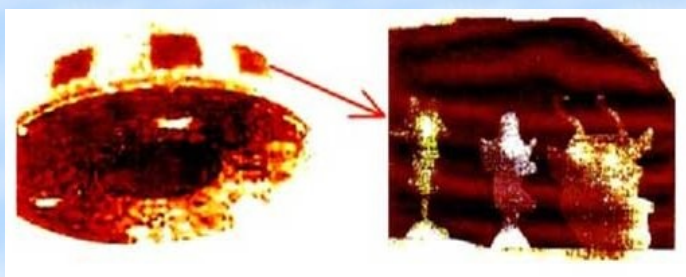

He saw a smaller UFO emerging beneath the UFO and speeding off to a clearing in the sky just a short distance away from "the Mother ship" and stopped. He then snapped the remaining pictures left in his camera in rapid succession as the small UFO stood wobbled for more than 15 seconds before speeding off into the clouds.

The website says Ron S. Stewart has for some time now been the most sought after scientist by Fortune 500 companies, "one company has twice requested Technical Presentations on his

Imaging process for possible Partnership/Alliance" as well as by the International UFO community, and that his "work will be displayed at the 19th Annual International UFO Congress Convention and Film Festival, Saturday February 27, 2010 at 8:30 am to 11:45 am at the Aquarius Resort in Laughlin, Nevada."

The website shows images they said to be "produced by APEP, (Advanced Photographic Extraction Process)" and to be "shocking to say the least", "but very telling."

One image (below) is said to be the small craft released by "the Mother ship" with three windows on the top facing the camera, and that the first window on the right with the red arrow pointing towards it "contains three Aliens", while the center window "also contains a Alien but will not be shown in this article as well as the far left window."

*This image is said to be
"the far right window enlarged with three Alien's looking out."*

**Reliability evaluation:
hoax, false**
