

MAY 4, 2018 – ENTERPRISE UTAH

From *MUFON* web site, article by Roger Marsh

A Utah witness at Enterprise reported encountering and photographing an object with two green lights that followed her home, according to testimony in Case 91780 from the Mutual UFO Network (MUFON) witness reporting database.

The witness was driving home from St. George to Enterprise heading northwest on Highway 18 at approximately 2:45 a.m. on May 4, 2018.

“At approximately mile marker 38, I saw two green lights to the southwest of me,” the witness stated. “As I drove through the canyon, the lights came closer towards me and was descending from the dark sky. My initial thought was, ‘what a weird place to see a drone,’ but as I thought through it I realized nobody would be flying a drone in this area at this time of morning.

“Then as the lights got closer, I realized this was a bigger object than I thought, and it began hovering next to me as I drove. I reached for my phone to take a picture and the object hovered above me then hovered just ahead of me hugged up to the mountainside. I wondered if it was going to land because it was so low. Then it hovered up and over the mountain, keeping close to the treetops and then out of sight in a northern direction. As I came out of the canyon, I scanned the dark sky looking for the green lights again, but I didn’t see anything but stars. As I continued driving home, I was questioning what I

saw and my own sanity. Then as I turned right down my street there were the two green lights again, about 150 yards in front of me and approximately 20 feet above the ground coming at me, so I turned my lights off and grabbed my phone. As I snapped two pictures, the object just hovered in place for about 15 seconds. This is when I noticed the green lights spinning into and out of sight and the first time, I saw an orange-ish red light blinking below the green lights; then it floated away in a southwest direction.”

When the witness got home, the green and red lights were still seen in the distance.

“I was so creeped out and was afraid of abduction because of the object ‘following’ and ‘watching’ me that I sat in my car with the lights and engine off for five minutes before running in my house and locking all the doors and shutting all the blinds. I could not hear anything, and I could not make out a formation with my naked vision. But, when I looked at the pictures I had taken, I then saw the formation of the object, the windows in the object and some sort of blue glow at the top of the formation. None of those visible to the naked eye in the dark. I continue to now hear a ‘hovering’ sound over my house come and go as I type this – four times in the last hour, but when I look outside there is nothing to be seen. Then the sound just disappears. I’m not 100 percent sure this is related, but we do not have known flying objects such as helicopters flying around Enterprise, and the sound is not that of an airplane.”

Utah MUFON Assistant State Director Stephen Walker closed this case as an Unknown Aerial Vehicle.

“The witness had a close encounter with an unknown air vehicle,” Walker wrote in his report. “It played a form of tag with her while she was driving. She stated she was fearful of a possible abduction due to the closeness of the object especially when it was traveling on top of her car. She also noted that it pulled in front of her while she was in the canyon and she thought it might try to land. She stated that it seemed to have difficulty while inside the canyon and it climbed up over the mountainside and vanished. The darker side of this sighting occurred when she arrived home. The witness stated as she turned onto the street before her house, the object reappeared rising up from the cemetery across the street and floated toward her and blocked the intersection hovering less than 20 feet above the ground. She stopped the car, turned off the headlights and snapped two photos. The witness believes that the object had landed in the cemetery and was waiting for her with some type of intent. I found the witness to be intelligent and highly credible in this event.”

Enterprise is a city in northwestern Washington County, Utah, population 1,711.
