Urban or Rural. It happened in my village, my house is at the end of the village. It means my house was surrounded by fields; we were the only family who lived there in 1999. There is another house near but no one lived there at the time. Near the house there is also a forest.

Entity Description: He was a typical “Gray” alien (big head, big black eyes, small mouth, very tiny body and two small nose holes. He was 1.48 meter tall and he was about 26 centimeters wide (shoulders) but the interesting thing is that his head was as wide as his body. I was 2 meters away from the alien, he was 1.48 meter tall.

My parents were working inside the house (we were building our house) and I was messing around and playing in the living room. Suddenly I looked through the window and saw an alien; he was gray colored and not very tall (my shoulders height) with big black eyes and small mouth. I’ve been looking at him for about 5 seconds (I was at 2 meters of distance from him) and called my parents to look after the alien. At first they didn’t believe me, but when they noticed that I was really stunned and shocked, they looked around the house but nothing suspicious was there.

Reliability evaluation:

- very low -

one witness only; anonymous;

possible confusion with an animal;

no investigation; insufficient information
