

1995: Vejle, Jutland, Denmark

September 29, 9.30 pm

Source: investigation by Torben Birkeholm
of SUFOI's Field Investigator in Jutland.

Sketch of the incident

The site of the incident

A 24-year-old man was driving to visit his parents in Vejle in Jutland, Denmark, when he experienced a dramatic stop of his car. It happened when a disc-shaped UFO with a powerful light hovered over his vehicle. The object was only 3-4 meters above the car, and he could see a number of circular lamps on the underside. After a short time the intensity of the light from the UFO diminished, and it slowly moved away and out of sight. Then he was able to start the car again normally.

After driving 35 km the witness reached his parents home and immediately told them what had happened. The experience was still affecting him and he was shaking. His parents asked him to contact someone - there must be some 'UFO people' he could ring. But he was too frightened and upset and did not phone anyone...

The 24-year-old man lives in Aalborg (northern Jutland), where he is a student nurse... He comes across as a surprised and honest person who gives no impression of being other than very normal.

Reliability evaluation:

- high -

**something really seen by the witness; one witness only;
possible confusion with a helicopter or a balloon;
insufficient investigation on the reason of the car stop**
