

N.E.P.R.C.C.

Presents

A Novice

Run what ya brung ½ hour Endurance Challenge Event ---

Skip made suggestions to President Angelo Tata.

So we designed this format at Skips request and suggestions for the many club members and non club members that Skippy says approached him and would like to give this type of R/C a try without having to purchase a specific dedicated pylon plane and Engine to see if they like R/C pylon and pylon endurance racing ---

Suggested Crew

Pilot, Pit/Fuel man

Suggestions from Skippy are,

PLANE

Any plane, Even high wing trainer.

Engine

Any Glow engine.

Very simple Instructions for Novice ½ hour event----

Hard hats are mandatory --- Safety first!

Be sure your batteries have enough MAH. and will last the whole ½ hour ---

Suggested Mandatory pit stops (3) ---

Basically the rules are, there are no rules – Skip wants, A Run what ya brung! And that's it ---

So, In keeping with fairness and maintaining a level playing field,

Any and all Seasoned Club 40 Pylon racers are NOT allowed to enter this Novice class event ---

That would just intimidate the new pylon pilots, ruin their fun, and that just plain wouldn't be fair –

We wouldn't want to go see an Eagles Football game

if they were going to play a junior high school team, would we?
