**Race Recap**

**No wind, no rain, just sunshine on a near perfect day for our second race of the year. Eight racers including Skip fielded their models to put their nerves and skills to the test.**

**Unfortunately, Skip's plane's radio glitched and his plane went in on his first heat. Several heats were close and very competitive. So close one midair caused damage to John's yellow bird, but he flew on and was able to make some field repairs to continue flying and flying well. In the final round of the day Charging Charlie won his first heat race ever. But the main event results were modified because of cuts causing one DQ and one position penalty giving Marty the win and a 3-way tie for first place.**

**A big thank you to the field crew for getting the field in excellent shape and our members who helped with cut judging and lap counting.**
