

## **Club 40 Pylon race results, Sunday, July 27<sup>th</sup> 2025.**

We held our first fall race on September 14th. It was an almost perfect day with bright sunshine and a low to moderate right-to-left breeze. We fielded seven pilots. Skip was still running his glow-powered plane and won a race heat when all the hotshot electric pilots DQ'ed. All the pilots are now running 9-7.5 prop as the maximum allowed. Charging Charlie overcontrolled his green machine and put it nose in on the first race. He had more trouble with his backup plane in the last heat because he put the used battery in the plane and had to land after 7 slow laps. These races move along and in less than 2 hours we were putting the poles away. Our next/5th race is scheduled for October 12. Potentially, we will move the last race of the season to October 19, or 26 from the scheduled November race.
