**Goals/Notes/Recommendations:**

**Salem Lakes  
Association.**

Rob Patton, diver, moved existing bottom barriers at red buoy, #29 to a location just west of present buoy location. Red buoy #29 was not moved as new location was close by. Bottom barriers were first returned to the boat where they were rolled to assist diver with reapplication. Rebar was also temporarily returned to the boat. About 12 milfoil plants were removed at this site. Survey work continued to boat launch where few additional EWM was located. Continue from that location on next dive or start closer to Clyde River inlet to Big Salem if diver thinks this is best. EW
