## N3NZ

7A EPA

All counts are QSOs, not points.

Notes: Results shown here are just counts from the logged contacts. If there were errors made in logging contacts, the compiler of these results didn't know that. Why twenty-two 80 meter phone contacts were logged as 70 meter SSB will forever remain a mystery. Everyone was asked to use their call sign. Someone called "NAT" either didn't get the message or doesn't have a call sign.

The GOTA station is *excluded* from these statistics, and is reported separately on page 4.
