

THE VIBRATION OF VIOUS

Vious is about shifting the conscious to a higher matrix grid that generates an awakening in consciousness, creating a more blissful state of being. Once awakened, one is no longer controlled by the lower physical and being manipulated by the physical realm. One has more inner fulfillment and connection to source that gives a sense of liberation from the lower matrix where all of the unbalanced and negative energies exist looking to feed off you. There are many benefits to being at a higher vibration from a longer and better quality of life to not being enslaved to a substance like drugs, alcohol, and so on.

THE PRACTICES OF BEING

There are four fundamental practices for the way of being. Here is a list of the four practices:

In order to make the shift to another level, there are four fundamental practices that can be vital to your way of being. Here are four fundamental practices with some examples that you want in your existence:

1 – SUBCONSCIOUS LIVING OR KARMIC/DHARMIC LIVING:

Energy clearing; **Shadow work**; keeping your aura field clean; removing energetic blocks; Creating your **protection** (whether it is Spiritual animal, A field, Quotes, Affirmations, Sayings, ETC.); Sphere effect

2 – CONSCIOUSLY LIVING: Having awareness; Awaken consciousness; Being open-minded; PEEMology

3 – EMPOWERMENT LIVING: Self-mastery; Enriching self; Going thru transformation; Enhancement; GEEDology; Consciousness techniques; bending perception

4 – ENERGETIC LIVING: Integrating energetic, subjective, universal, and other higher laws and principles in your living; Having true intent; Having integrity; Doing energetic/subjective work (meditation, prayer, affirmations, mandala, breath work, ETC.); Using universal laws; Healing modalities; TUC (The Universal Code); Using interface with the energy

In order to make the shift to human 3 point 0 (H3.0), these four fundamental ways of practice can be vital in your existence.

VIOUS MANIFESTING DIAGRAM

The vious manifesting diagram shows one how to manifest reality. It shows how one is always manifesting their reality, even when they are not aware of it. That is why when things happen to people they wonder why, not aware of how they manifested it. Sometimes, we get things in life that we manifested a long time ago, maybe when we were much younger. Do not expect your action to correspond with your karmic outcome. For example, one could cheat others out of money but their karma could manifest later in life as bad health. In the diagram, your conscious is on one side, on the other side is your inner core (a source), and your vibration is in the middle. What is in your consciousness is constantly flowing to your inner core. Your inner core, acting as a source, is creating your reality by reflecting back into your reality what is in your conscious mind. The more quality of your conscious mind, the better outcome, and quality of your life will be. If your mind is full of chaos, the core will loop chaos back to you. The cycle for this manifestation to loop is determined by your vibration rate. The higher your vibration, the faster those things can manifest for you. Understanding how your conscious energy flows, allows you to take your power back from others and empower you to be self-sufficient in manifesting your reality. Being that your consciousness is part of the collective consciousness makes it difficult to manifest things that will affect the collective or create changes in society.
