

THE PRINCIPLES OF VIOLOGY

The planet Earth has been in existence for billions of years and is known by many names. At one time the planet had highly developed energetic beings that existed in the light body. Over a period of time, the beings started to manifest a physical form. This process does not take away or deny other creations and evolutionary processes. Some refer to this process as the fall.

As the process continued, the physical beings started to lose their abilities of the higher self and started to function in a restricted state of being. This confinement way of life caused them to focus their development on other ways to better function in a restricted reality.

As the cycle of this physical form is completed, the higher vibration of the planet will start to fade back into reality. Now is the time to prepare and configure yourself for this cycle if you wish to take advantage of this transition. Also, it is time to start implementing systems, structures, and organizations that are more in harmony with the ongoing changes of creation. Viology was established to be in sync with the evolution process as it is taking place on the planet.

The process of perpetual evolution to higher levels of vibration and to expand consciousness which will bring self-fulfillment, produce an ongoing reality, and allow one to stay in harmony with creation is the philosophy and concept established by The Principles of Viology.

PRINCIPLE I

Viology says to determine your own belief or it will be determined for you. One without a belief will fall for any belief whether it is good or not. One's beliefs are limited by their experiences. The fewer restrictions one has the broader their belief will be.

Experiences help one to know self, and then one can create for self. Your beliefs will come from a combination of other beliefs - for there is nothing new under the sun.

PRINCIPLE II

Once one has conquered the desire for religion and philosophy, then the next level is the actual manifesting of his belief.

Why religion is like studying a map, Viology is like actually taking the trip you have mapped out. Taking what one hopes for and putting it into action. If one wants peace then one practices peaceful solutions. If one wants a place with no homeless, then one practices creating a system to take care of the homeless.

Develop the idea and then practice it and it will come and your paradigm will be created.

PRINCIPLE III

Viology says that one is whole, but through duality, one is not aware of his wholeness. Duality provides the opportunity for development through experiences. As one becomes whole they become in harmony with the creator. To know oneself helps one to develop and to be whole. Therefore, the need for development takes preference over your emotional preference (your conscious desires). Once the development is accomplished, then the emotional preference can manifest.

PRINCIPLE IV

The total existence of everything is the All. Everything functions with a purpose (known or unknown) in the All. Everyone is part of the All, but can only influence their awareness. One cannot comprehend anything greater than one's awareness.

PRINCIPLE V

In Viology not everyone will develop at the same time or at the same rate, which is the rate of development (ROD). The rate of development is what creates conflict and chaos when one is not in harmony or balance with their development. This is seen in these examples: when it's time for friends or partners to take different paths when two countries are at different levels of development but try to influence the other country - leading to war when a belief is different from others and is not acceptable when one fight with their self and refuse to change, and many others dualities.

PRINCIPLE VI

Viology says to always be positive in order to bring a positive result

PRINCIPLE VII

Viology says through duality you understand ones. To know something is to know its opposite effect. To know daytime is to know nighttime - to know good is to know evil - to know hot is to know cold - to know is to experience. If it is always 90*f or above and then one day it is below 30*f, one will know hot by experiencing the cold because of the chills and putting on clothes - then one understands hot by knowing what it is not, cold.

PRINCIPLE IIX

Viology says to focus on the inner to manifest the outer. If one seeks wealth, love, happiness, etc., first they must manifest it within. No matter how much money one receives, one million or ten million, they will have money but will not feel rich unless they have developed richness within. One that manifests love within will not be fooled by outer love.

PRINCIPLE IX

Viology says no one is to be kept from their development, but one can be assisted in their rehabilitation. Punishment is negative energy, why rehabilitation is helpful.

PRINCIPLE X

Viology says that everything is energy - that is energy vibrating at different levels. No one is greater or less than another one. Everyone is experiencing different things at different times to help them in their lessons and development. Some experience what it's like to be tall and others are experiencing being short - some rich and others poor.

PRINCIPLE XI

Viology says that the greatest energy is sexual energy, for sexual energy is the reason for your existence. One is produced through sexual energy. To control and deny one of their sexual energy is to deny and control their existence and their link to The Creator.

One should deal with sexual energy through science like they deal with other energy. Sexual energy must be properly talked about and used. One's sexual energy should not be controlled by anyone, or it would be interfering with their Creator. Sexual energy is seen in a different light in viology than it is viewed by one with restricted beliefs.

PRINCIPLE XII

Viology does not create a perfect being or a perfect society, but the act of always perfecting. One shall constantly find ways to develop and improve their self and their society. One controls his destiny and his rate of development. Viology is the development in all aspects which is based on the concept of subjective, physical, emotional, economic, and mental (SPEEM). SPEEM is the development of the whole.

PRINCIPLE XIII

The process of expanding your vibration and progression for transformation and empowerment is the focus of Viology.
