

ABOUT VIOUS

In life when a critical point is reached in a cycle, reality cannot advance or progress. At this point, life force stagnates, causing reality to soon decay away. To continue existence, realities will have to keep evolving similar to the cycle for the division of cells known as cytokinesis (the process where one cell splits off from its sister cell). Now that people in society are feeling that life is in a loop and searching for more fulfilling experiences, can be a sign that it is time for transformation, empowerment, and a more meaningful reality.

Some people wonder why their progressive ideas and views are not accepted in society. Why do the system and the establishment seem to work against them? Maybe, the old structures were not designed to handle advanced and evolving concepts and principles. New structures and organizations have to be formed based on higher concepts in order to facilitate the paradigms of the future. As the saying goes, don't put new wine in old skin. It is up to you to create and manifest the new reality that you want. No one is going to do it for you or can do it for you, especially the old system that is based on greed, fear, self-centered and other unbalanced behaviors that cannot understand where you are going, feel what it is that you are feeling or see the world that you are visualizing.

Vious is helping in trailblazing the way of The New.

Vious is more than an association, it is more of a way of existing, a way of being, a way of vibrating, a continuum – it's a Reality. The Vious network allows you to be who you are and empowers you with the potential of who you can be and want to be.

The Vious continuum is a matrix grid that is powered by Viun the inner source that works in union with the Vious concept and system. Once one is ready to evolve and think that they are prepared for the Vious way of being, one may voluntarily shift to the Vious matrix and take advantage of all that it has to offer.
