

Name: _____

Word Problem Math

1. You have 3 days to finish reading a book you've checked out from the library. You have 112 pages to go. If you read 48 pages the first day and 36 pages the second day, how many pages will you need to read the third day in order to finish the book on time?

2. Your soccer league has 120 members. 43 members are 4th graders. The rest are in 5th grade. How many more 5th graders are there than 4th graders?

3. The *difference* between two numbers is 48. If the greater number is 126, what is the smaller number?
(NOTE: The *difference* between two numbers is the *answer* you get when you subtract the smaller number from the larger one.)
