

Name: _____

Easy Word Problems

1. You have 7 times as many marbles as your little brother. If you have 63 marbles, how many total marbles do you and your brother have combined?
2. You collected 60 gummy worms on Halloween. If you eat 4 worms a day, how many will be left at the end of two weeks?
1. Your friend is 5 times as old as his little sister. If your friend is 10, how many years older is he than his sister?
2. Your cousin wants to buy a car. It costs 9 times as much to buy a *new* one as it does to buy a *used* one. If a *new* car costs \$27,000 how much does a *used* one cost?

How much money will your cousin save if he buys the used car?

3. You want to buy a new bike that costs \$170. Your neighbor offers to pay you \$6 a day to walk her dog. If you save all the money you earn, will you have enough for the bike at the end of 4 weeks?
