Name: _____

1. There are 48 students in fourth grade, and they all went trick-or-treating
   together on Halloween. If each student collected 89 pieces of candy, how
   many *total* pieces of candy did the fourth graders collect?

2. Evelyn, Esther, and Karen made cranberry cookies to give to their friends
   on Thanksgiving. They baked 17 batches of cookies. Each batch had 26
   cookies in it. How many cookies did they make?

3. Elias and John picked apples for a Halloween apple-bobbing contest.
   Altogether, they climbed 14 trees and picked 28 apples from _each_ tree.
   How many apples did they have for their contest?

4. Isles, Sofia, and Keyla made paper cut-outs for the Day of the Dead. They had 15 different colors of paper and used 18 sheets of *each* color. How many total sheets of paper did they use?

5. Guy Fawkes put 36 barrels of gunpowder in the cellar under the House of Parliament. This was 4 *times* as much gunpowder as he actually needed. How many barrels of gunpowder did Guy need to blow up Parliament?

How *many* *more* barrels of gunpowder did Guy put in the cellar than he actually needed?
