1. If (in the story *Too Many Tamales*) Maria's mom had made 3 dozen tamales for Christmas dinner, and Maria and her cousins (4 children total) split them equally among themselves, how many tamales did each child eat?

2. For the second batch, they make another 3 dozen tamales. If the 6 adults eat 5 tamales each, and each child eats only one tamale, how many tamales will be left over?

3. You made 26 Christmas cookies for your 9 best friends. If you divide them up so that each friend gets the _exact_ same number of cookies, how many cookies will each friend get?

   How many _more cookies would you need_ to make, if you want each friend to get one more cookie?

4. You are packing 250 oranges into crates that hold at most 30 oranges each. What is the fewest number of crates you'll need to fit _all_ the oranges?

   What if you only have 7 crates? How many oranges can they hold?

   How many extra oranges will there be? _____
