Name: _____

More Long Division

1. Edna and Dasha are bagging up peppermint candies to give to their friends. They **have 8 dozen** peppermints. If they want to have *exactly* **5** peppermints in each bag, how many bags of candy can they make?

Will there be a bag for everyone in the class (all 21 of you)? _____

What if they put just **4** peppermints in a bag? Will there be enough bags for each of you to have one?

Will there be enough for Ms. Freedman to have a bag also? _____
