Name: _____

1. Fill in the blanks to form equations which are equivalent to 3 x 6 = 18:

    18 = 6 x _____   18 ÷ _____ = 3   _____ ÷ 3 = 6

2. You are arranging 48 chairs in rows of 8 chairs each, and you want to
    know how many rows there will be. If **r** stands for the NUMBER OF ROWS,
    circle **_all_** the equations (below) that show how you could think about the
    problem:

        8 x r = 48   48 ÷ 8 = r   48 = r x 8   48 ÷ r = 8

3. If Ruby makes **2,326** lunches a week for Franklin students, how many
    lunches does she make in **3** weeks?

4. The sidewalk in front of the school is 4 feet wide and has an area of 2004
    square feet. How long is it? (Remember to include the correct unit with your
    answer.)

5. Circle the primes: 21   23   25   27   29   31
