

Name: _____

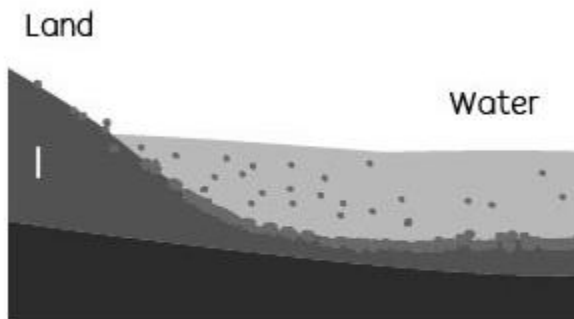

ROCK FORMATION SUMMARY

Weathering and Erosion:

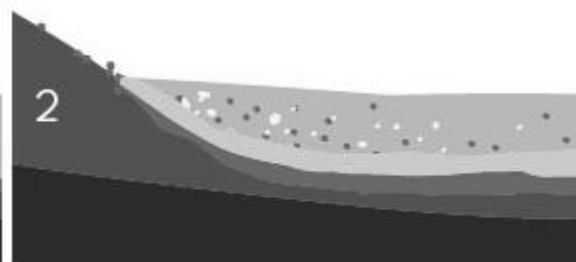

Sedimentary Rock Formation:

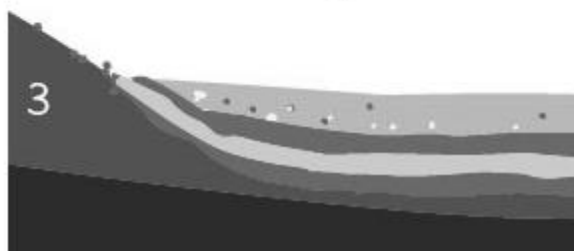

Eroded sediments end up in the water and begin to settle (sedimentation)

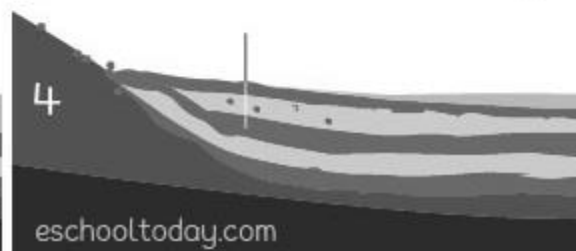

With time, more layers pile up and presses down the lower layers (Compaction)

More layers (strata) and further compaction forces out water from the layers

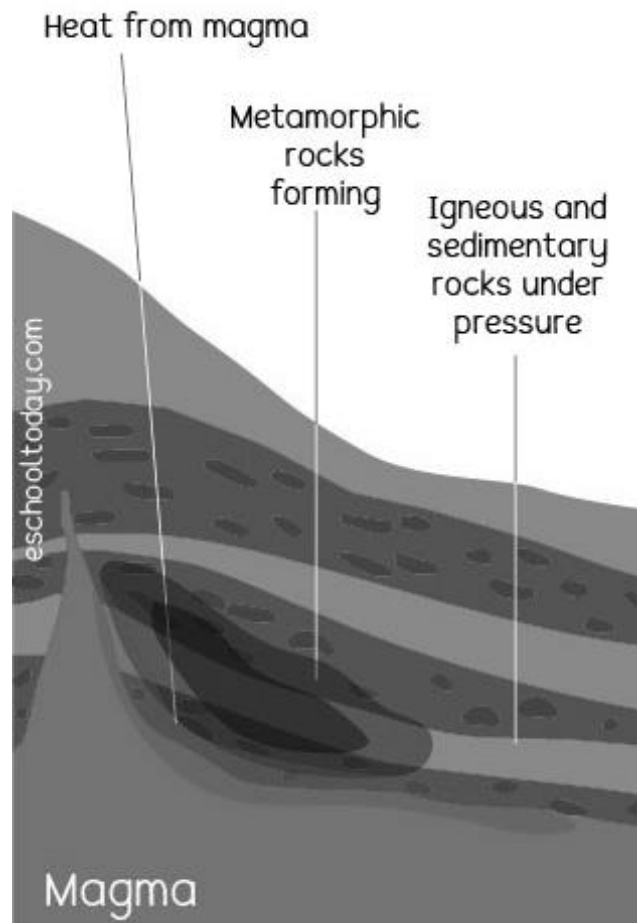

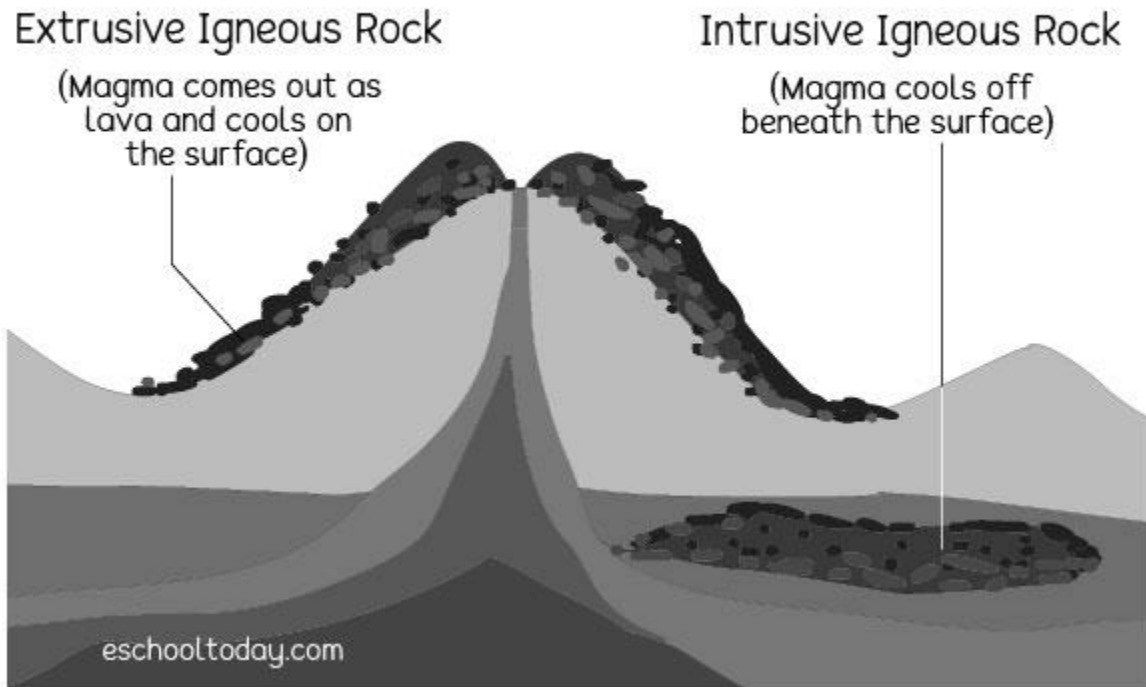

Salt crystals glue the layers together (cementation)
Rock mass formed is sedimentary

Name: _____

ROCK FORMATION SUMMARY

Igneous Rock Formation:

← Metamorphic Rock Formation
