

Name: _____

Wednesday Math

Write all answers as whole or mixed numbers.

1. The book you are reading has 10 chapters (all of the same length). You are $\frac{3}{5}$ way through the first chapter. How many more chapters must you read in order to finish the book?
2. Mia and Dannyella want to make some cookies. The recipe calls for 3 C (cups) of flour, but the girls only have $\frac{5}{8}$ C. How much more flour do they need?
3. Your room is such a mess that it will take 4 hours to get it clean. You have already spent $\frac{3}{4}$ hour cleaning. How much more time will you have to spend before the room is clean?
4. Nixon and Julio made 5 pizzas for a class party. After the party, there was $\frac{5}{8}$ of a pizza left over. How much pizza did the class eat? (Give answer as mixed number.)
5. You bought a box of 6 granola bars and ate $\frac{2}{3}$ of a bar. How many granola bars do you have left? (Give answer as mixed number.)
