

Name: _____

1. What is Ramadan?
2. The Islamic lunar calendar is shorter than our solar calendar. This means that Ramadan moves through the months and seasons of our solar year, arriving about 11 days earlier each year than it did the year before. If Ramadan starts this year (2022) on the evening of April 2, when will it start next year (2023)?
3. Why is Ramadan important to Muslims?
4. What is the Quran?
5. How do Muslims observe Ramadan?
6. What is Eid al-Fatr?
