R649.99 per unit.

We offer a wide range of residential, corporate and commercial maintenance products for all our clients, including what we call a special project maintenance. Our independence from local conflicts or market agreements sets us apart from the competition, allowing us to find the best tailor-made risk management solutions for our client's different needs. Our exclusive maintenance deal is the first of its kind and enables our clients to secure their utility systems, protecting them against malfunctioning, explosions, theft, among other possible issues they might come across. We pride ourselves in our state-of-the-art monitoring systems which are second to none. The more complex your maintenance needs are, the more we thrive and are able to deliver bespoke solutions that best fit those needs.

Wired-Up Prepaid Meter Services

24 Hours Technical Support

Every tenant gets his or her own technician which they can call at any given time should they have issues with their utility systems. Should the installer be tired-up somewhere, he will send an alternative support & all this happen in no more than 2 hours.

Mr. Fix-it All

We have 15 qualified technicians on standby to help fix tenants' faulty electrical appliances at no extra charge. The service is FREE!!!

TURNKEY SOLUTION

Your complete PMS ensures that your client's investment is taken care of; hence as part of our mission, we protect your clients from growing utility expenses, and also ensure they recover 100% of what they spent on buying water and electricity from distributors such as Eskom and Water Distribution Companies.

WE NEW, HIP AND HAPPENING!

We have The Power to Perform & The Passion to Please. Our approach is one of collaboration: the creative process is cultivated through active client involvement at every stage, from the initial concept creation to the project's final stage.

Service Features and Benefits

Wired-Up Prepaid Meter Services developed a 100% unique and high valued protective system called G.A.S.E Protector which provides our clients with best protection from the unforeseen circumstances that can affect their budget and tarnish their reputation.

G.A.S.E Protective System is set in place to ensure that all prepaid meters are fully functional at all times. It ensures that no meter is bridged or tampered or stays faulty and not attended to within the first 12 Hours of receiving the notification from the system itself. Our holistic risk solutions are perfectly tailored to suit our client's needs and are 100% effective and eliminates any possibilities of utility systems being tampered.

We proposing a service that has no hidden-costs, hidden-claws, no access nor call-out-fees. A service that will never leave your tenants in the dark for more than 2 hours from when the claim is made. We believe that "simplicity is key" hence we've made our processes as simple and quick as lightning. We care about your clients as much as we care about all our clients. We always thrive to provide a service that favors all parties, namely; our clients, the tenants, vending companies, then us. Our service guarantees that no meter will remain tampered or bridged for more than 12 hours and not be attended to as soon as our G.A.S.E Protective System communicates with us. Our practice is as easy as 1.2.3. If a tenant has an issue with their utility system, they have an option to call our Call Centre or their assigned installers or inspectors or even send an SMS or fill the request form on our website should they find all lines busy then someone will call them back within the first 2 hours of us receiving the request.

Our service provides monthly check-ups to all sites, complexes, buildings, flats, etc. as long as you have utility systems registered with us. Our inspectors will visit maybe three or four times within a month to check not just the utility systems but also to see if there's no issues such as electric shocks, shortages, unnecessary outages, etc. We promise that landlords will never complain about tenants using electricity for free while they spend money to buy that very same electricity. Now every cent spent by landlords for buying electricity will come back to them as it was supposed to be.

Why should we be considered?

In this world of infinite choices and infinite possibilities, we bring you meaning, excellence and significance.

- Excellence is not an act, but a habit. A habit we have embraced to become our culture, which guides everything we do. We have a strong need & goal to grow our brands & all of our companies to become industry leaders across the African continent. Our capacity, in terms of human resources, ensures that we are able to immediately get to work on our client's account & give it the high quality attention & precision it deserves, within budget & on time.
- **We don't over promise but we always over deliver.**
- Since we new, fresh, capable, creative and affordable, this simply means "we don't follow trends but we setting new rules".
- We believe experience is the best teacher, that's why we continually learned from the best in the business and we surround our business with mentors.
- SO!!! Us saying "we save you money" it's not a speech but we prove it by all the discounts, simplicity and convenience we give to all our clients.
- Research shows that there's **NO** any other company that gives its clients up to 75% Discount on all services under their umbrella. Its only us.
