

Magdalen Community Core Beliefs

We believe that:

---Mary Magdalene is a Liminal figure who calls us out. She is the threshold of the new paradigm

---Women must be moved beyond the “Virgin” & “Prostitute” image

---The Community moves beyond personal sensitivities & suffering

---The Community is inclusive (and open to all world religions, genders, faiths).

We are a place where the individual meet at the Group Consciousness

---We share the (Child) of True Humanity within us and it is the connecting link between us

---Each member is a connected form of the sum of something greater

---The Community honors feelings and intuition, respecting the voice of each member and acknowledging the voice in our own being and our own voice of truth.

---The Community embraces the concept of agreement and consensus verses majority

---We believe The Community is part of the paradigm shift to a new world of reconciliation (and understanding)

---While we embrace the historical and scholarly study, we recognize that Mary Magdalene is the Mystical “something” that was left out

---We recognize that a process of growth and change occurs as people dwell, work or meet with each other and remind ourselves to seek out the highest good in each of us. We hold our core beliefs as guiding principles in this process

“We realize that our Core Values are only words on paper...providing a place and a space to begin dialogue and sharing our ‘values.’ Just as the Child of True Humanity, lies within each of us...and are always present.”
