CUSTOM MADE TAMAGOTCHI ON / MEETS WALLPAPERS, FOOD / DRINK OR ITEMS

Okay, a couple of steps: I have made my own Tamagotchi Wallpapers/Food/Drinks/Items so far and it is so much more fun!

Wallpaper/Food/Drink/Item: STEP ONE > Download a drawing program like free program GIMP and the MyMeets App (from Tamatown.com)

2. Make a new canvas by 128x128 (Wallpaper) and 24x24 (Food / Drink) and I recommend using a canvas between 30-40 px or 36x36 as the object will move in your Tama screen (Items)

3. Use a raster 1x1 px or not, you will learn very quick how to draw pixels

4. (WALLPAPERS) Make many layers, one for every accessory, so you can change and move it as much as you want. To delete one accessory or change the colour of one accessory. (one frame>wallpaper).
(FOOD / DRINKS) You will need 3 frames (3 different documents/three GIMP files) for Food / Drink. 1 Whole food/drink, one half empty food/drink and one a quarter empty food/drink.
(ITEM) You will need 4 frames (4 different documents/three GIMP files) for Items. Because an item moves, you will need to make a little animation with 4 different positions with the item you have made. See this:
https://docs.google.com/document/d/115BXfe5F0yry6-N_Zi5UWPbAzTXbCp7q23GlYdP4YKU/edit

5. Maximum colours to use: 16. (WALLPAPER) Use 15 colours and 1 dot in one corner in a colour you didn't use. Otherwise your wallpaper will turn bright green or black on your Tama when you convert it and download it on your Tama's.

6. When you're done with your wallpaper, food/drink or item in for example GIMP, export it to a .PNG file on your pc/laptop (doesn't matter where you save it, just save it in a map you like).

7. Open the MyMeets Studio App and insert the .PNG file. Change the name of the thing you have made: wallpaper, food/drink or item. Change also (if you want) the price and the name of the file itself. The .PNG file will now be converted into a .TXT file.

8. Save .TXT file in the right map in the MyMeets files and DONE (Assets>Items>EN or JP>Save it)

9. Open the MyMeets App and download your own wallpaper, food / drink or item !!

10. Pro tip! Use very bright colours, because your Tama makes the colours a bit grey and darker.

It's so easy and a fun thing to do. Your wallpaper, food / drink or item should now be available in MyMeets. Download it into you Tama the normal way. On your Tama go to Connection>App>Download. On MyMeets Send (left corner)>Connect (pop-up screen). Hopefully everything works out just fine! <3
