Empowering Minds
Transforming Leaders
Improving Business & Wellness

Mental health in the workplace is an issue that affects everyone. According to the National Institute of Health and Care Excellence (NICE), 13.7 million working days are lost each year in the UK because of work-related stress, anxiety and depression, costing £28.3 billion yearly to the UK economy. Most training providers share the coping mechanisms and ways to identify the problem as a core part of their training. Our trainings are more geared towards preventing the problem from happening in the first place.

There will be three aspects of the workshop:

- 1. Understanding Human Mind and Mental Health:** This section of the workshop equips participants with knowledge, skills, and strategies to promote mental well-being, create a supportive work culture, and effectively manage mental health challenges in the workplace. Enhancing the understanding of mental health offers numerous benefits to organisations. It enhances employee well-being, reduces stigma, increases support, improves productivity, mitigates risks, enhances engagement and retention, fosters a positive work culture, and fulfils legal and ethical responsibilities. By investing in this, organisations prioritize mental health and create a healthier and more productive workplace for their employees.
- 2. Mental Toughness:** In today's fast-paced business world, mental toughness is increasingly becoming a crucial factor in determining the success or failure of an organisation. Mental toughness is defined as the ability to persevere through difficult situations and maintain a positive attitude in the face of adversity. This trait is especially important in the workplace, where employees face numerous challenges and obstacles daily.

Research has shown that mental toughness is closely linked to a range of positive outcomes in the workplace, including higher productivity, greater job satisfaction, and improved overall performance.

Mental toughness is also important for leaders within organizations. Leaders who possess this trait are better equipped to handle high-pressure situations and make difficult decisions in a calm and rational manner. The impact of mental toughness on the bottom line of an organization is significant. Employees who are mentally tough are better able to handle stress and uncertainty, which in turn leads to higher levels of productivity and better decision-making. A study by the consulting firm McKinsey & Company found that companies with mentally tough employees outperformed their less mentally tough counterparts by a wide margin.

- 3. Communicating with Empathy:** Empathy plays a crucial role in promoting mental health within an organization. It involves understanding and sharing the feelings, perspectives, and experiences of others. Empathy creates a supportive and compassionate work environment where individuals feel heard, understood, and validated. Empathy sets the foundation for a positive and inclusive organizational culture. When empathy is valued and demonstrated at all levels, it influences how employees interact with each other, their clients, and external stakeholders.

Fostering empathy within an organization has far-reaching benefits for mental health. It creates a supportive, inclusive, and emotionally safe environment where employees can thrive, leading to increased engagement, reduced stress, improved well-being, and stronger relationships among team members.

"Your organization's growth and bottom line are a direct reflection of the growth and development of your people. Investing in them is not just a moral obligation, but a strategic imperative for sustained success."

About Us

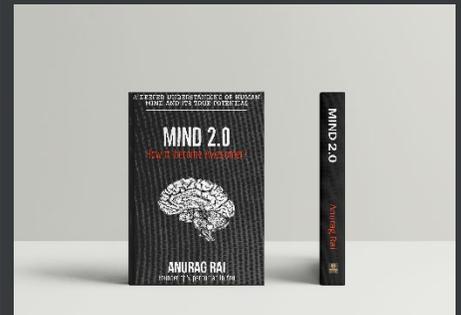

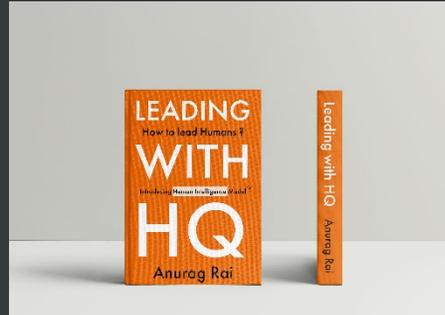

AMHWAL Academy is an organisation committed to helping professionals and businesses across the world achieve their full potential, by challenging beliefs and old practices that are limiting the way people show up at work and in life. We stand against practices and philosophies that are based on outdated research. The recent development in neuroscience and psychology proves the neuroplasticity of our brains and the fluid nature of our personalities.

We are a UK-based training center but have clients across the Globe. We have been proudly serving businesses since 2020.

Your Facilitator and Trainer

Anurag is an Organisational Psychologist registered member of the British Psychological Society. He is an award winning Leadership and Executive Coach and a Master NLP Practitioner. He has spent over a decade studying neuroscience, human psychology, and peak performance.

His books *The Power Within*, *Mind 2.0*, and *Leading with Human Quotient* are Amazon Bestsellers.

Organisations Anurag has worked with.

Why work with us?
