interest Charge Calculation Methods (ICM) and Computation of Balance Subject to Interest Rate. The Interest Charge Calculation Method applicable to your account for Cash Advances and Credit Purchases of goods and services that you obtain through the use of your card is specified on the front side of this statement and explained below. Method A - Average Daily Balance (including new transactions). The Interest Charge on purchases begins from the date the transaction is posted to your account, and the Interest Charge on cash advances begins from the date you obtained the cash advance, or the first day of the billing cycle in which it is posted to your account, whichever is later. There is no grace period. The Interest Charges for a billing cycle are computed by applying the Periodic Rate to the "average daily balance" of your account. To get the average daily balance, we take the beginning balance of your account each day, add any new purchases or cash advances, and subtract any payments, credits, non-accruing fees, and unpaid interest charges. This gives us the daily balance. Then we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. Method E - Average Daily Balance (excluding new transactions). To avoid incurring an additional Interest Charge on the balance of purchases (and cash advances if Method E is specified as applicable to cash advances) reflected on your monthly statement, you must pay the entire "New Balance" in full, shown on your monthly statement on or before the Payment Due Date. The Interest Charges for a billing cycle are computed by applying the Periodic Rate to the "average daily balance" of purchases (and if applicable, cash
