

UPDATED Cass Co Call Analysis (Cost & Compliance)

June 6, 2023- Steven Shaumeyer

This shows that the WCFPD is still not meeting the response time standards. Response times are broken down into. Urban, Suburban, and Rural areas. most of the WCFPD would fall into the suburban category. This requires ten personnel in ten minutes. The Call data from Cass County Shows that they are only meeting that standard 57% of the time. They are close to meeting the rural standard which is 14 minutes. They meet that 79 percent of the time now. The standard requires it to be met 80 percent of the time. All that being said, the lack of documenting personnel numbers does not show if they are getting the prescribed number of people to the scene. However, since my last understanding was that there are only 10 people in the department I would not think that that is the case.

The cost projection for calls since October shows the department would have spent Approximately \$22,500 for a split contract with belton and DWDFPD. If the WCFPD had agreed to that level of coverage
