**Course Description**

Art + History is a playful look at some of the great art and artists of Western Civilization from the Renaissance to present, beginning with Da Vinci and ending with Warhol.

Artists are some of the most fascinating people of their time. We will explore a dozen artists' lives, work, contribution to art and what was happening in the world during their lifetime and 48 influential works of art.

Art is a language and learning to really "see" art gives students an opportunity to think critically and deeply. By understanding the history and culture of the artists, and by learning to observe, analyze and interpret art within its original context, we can see the world and their work as they saw it.

Not only will student's begin to learn to "read" the language of art, they will be given opportunities to "speak" the language in their own way. Each artist we study will be accompanied by hands-on projects, designed to broaden creativity and experiment with the techniques that distinguished that artist.

This class was developed as an extension of the content and goals of the art curriculum Meet the Masters.
