

June 2024 Update

It's all about the balance in life. Demands are great these days, but our Lord is the solid rock we stand on.

At present we are enjoying some precious time with our family in Colorado Springs. There are very few bugs and a lot of mild weather with beautiful mountains surrounding the city.

Our huge recording project is moving along pretty well. We are working on a Bible slideshow walking through the Old and New Testaments. It is being formatted for cell phone use. These days a lot of tribal people have cell phones which they use for viewing such programs.

We are also supplying solar powered radios and micro chips loaded with Bible programs and music to go with this slideshow.

During my next trip to Bolivia in September we hope to purchase 60 radios along with 1,000 micro chips.

We will be sending these out to isolated families from three different language groups.

You might notice these lovely families don't have much in their homes, so this radio provides a prominent place where they can play a variety of Bible programs and music in their own languages.

The conference center is a huge blessing to many as they have special study times once a month with other villages.

We are very grateful for your prayers and financial help to see these projects completed.

Please check out our web sites at the addresses listed below. We are so thank for each of you who pray for us and help us every month and for those of you who help as you can.

God bless you and keep you all healthy and safe.

Sincerely in Christ,

Bruce and Jan Johnson/Ethnos360
