

CardiCoGen Project – Turbine Rotor Lift – CardiCoGen – Oregon

Project Description: Provided engineering services for the Turbine Rotor Lift.

Services Provided:

- Rigging balance,
- Elevation measurements, and
- OEM coordination for turbine alignment

Completion Date: 2023

Captured here is the rotor lift process at the CardiCoGen facility during the Oregon conversion project. The lift required exact rigging balance, elevation measurements, and OEM coordination for turbine alignment.

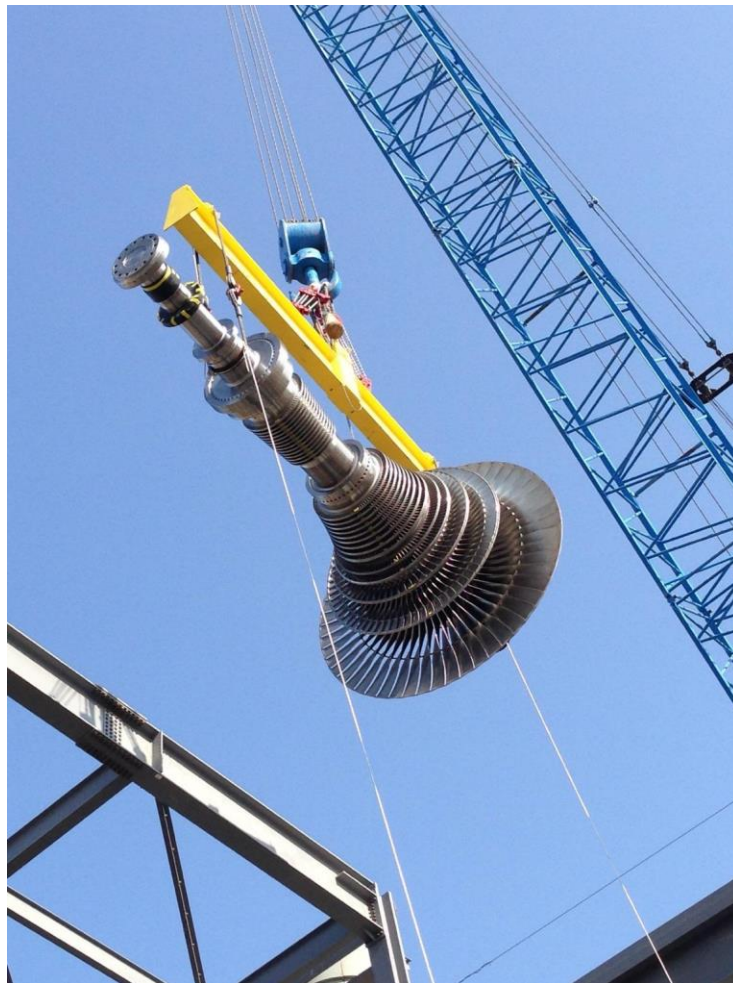

Figure: Rotor being lifted into position during CardiCoGen turbine assembly.

Figure: CardiCoGen turbine seated in final staging position for alignment and inspection.
