Bring your walls to life

We present to you the new 2019 WallArt catalogue including our new models : **Olivia and Ventura !**

WallArt brings your walls to life with her modern and eco friendly 3d wall panels made out of the fibrous residue of sugarcane.

This fibres of crushed sugarcane stalks, remaining after raw sugar is extracted from the juice of the sugarcane by shredding it, is now the raw material, called bagasse, that forms the base of this easily installed eco friendly product.

The raw material used for our 3d wall panel is **100% recycled, Paintable Texture, Oil Proof, Compostable and is therefore 100% biodegradable.**

In 2009 in the United States chosen by interior designers as one of the best and most innovative eco friendly home decor product of the year. The WallArt 3d wall panels all are made out of renewable sources which are biodegradable and therefore contribute to sustainability. The WallArt 3d wall panels are designed that when put together they form a pattern.

After installing them they can be painted in every colour which fits the interior of your house or a new to be created style.

WallArt introduced their 3d wall panels in Early 2010. They've been the first entering the market with this eco friendly home decor and interior product. At this moment there are 20 different models of the WallArt 3d wall panel available. For more information about them see our designs here. The WallArt 3d wall panels give an extra dimension to your walls and they fit in almost every room of the house. The living room, the bedroom : WallArt 3d wall panels bring your walls to life !

Eco product

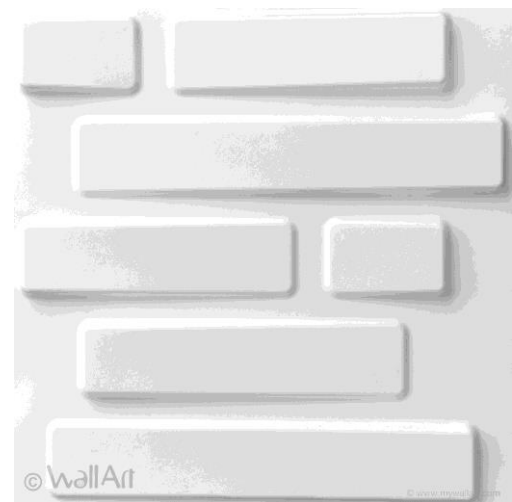

The raw material used for the production Of the WallArt 3d wall panels is the fibrous residue remaining after sugarcane stalks are crushed to extract their juice . Therefore we can claim that this fibrous residue used as the raw material is 100% recycled.

Bagasse , as a residue Of Sugarcane, is one Of the most renewable Sources because sugarcane can be harvested up to 3 times a year . The total harvest worldwide is more than 12 billion metric tons yearly, 3 ton Of sugarcane equals 1 ton Of bagasse, The raw material Of the WallArt 3d wall panels, bagasse, is also compostable and therefore 100% biodegradable at the end of its life cycle By re-using the waste of sugarcane production instead of burning it we can say it is a real eco-friendly product' .

Design Model : **BRICKS**

Turn any flat wall into a decorative 'brick' wall with our 3D wall cover model 'Bricks' from WallArt ! The vigorous design looks both industrial as well as nostalgic. Perfect if you want an eyecatching wall that's not too dominant !

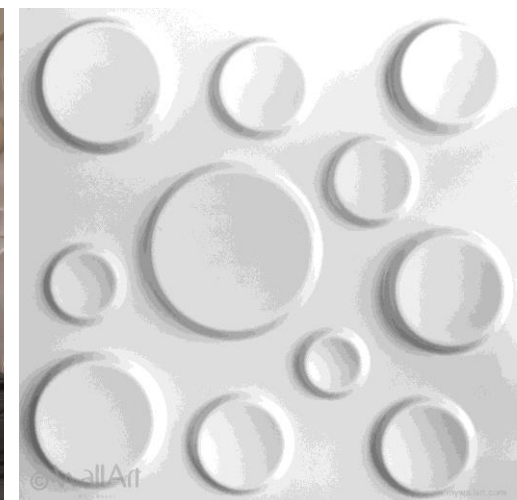

Design Model : **CARYOTAS**

Do you want to make your interior come to life ? The give it a dash of design with embossed 3D wall panels 'Caryotas' from WallArt. A lovely design which has a hint of flowers in it. Cover your living room or bedroom wall with it and you'll be amazed !
