

HOW TO INVEST YOUR MONEY INTO THE KINGDOM OF GOD

By: Fountain Hendricks

(Psalm 24:1)

We have the opportunity to choose which system we want to invest our money into. Most people choose to invest their money into the world's system because they do not know about the Kingdom of God. **EVERY** financial expert will tell you that "*investing*" is a risk.

The concept of investing is risky but there is a way to **REMOVE** the risk factor out of investing. When you invest money into the Kingdom of God you will always receive a return on your investment because putting something in the hands of King Jesus will **NEVER** come back void.

THE EARTH BELONGS TO THE LORD

(Psalm 24:1)

Psalm 24:1 says, "*The earth belongs to the Lord, and everything in it, the world and all its people.*" In order to know how to invest into the Kingdom of God you must study this verse very carefully. God said the earth and the world belongs to Him.

However, He **NEVER** said the **SYSTEMS** of the world belong to Him. The world and the systems it has **ADOPTED** is **NOT** the same thing. In the Hebrew dialect the word world in this scripture is defined as the earth.

The world is a large scale of land while the **SYSTEMS** of the world is a coordinated body of **METHODS, SCHEMES, PLANS, PRINCIPLES, KNOWLEDGE AND DOCTRINES.**

THE LANDSCAPE OF THE WORLD BELONGS TO GOD,
WHILE THE SYSTEMS OF THE WORLD DO NOT
BELONG TO HIM.

In order to invest your money into the Kingdom of God you must lend your money to what **BELONGS** to God, which is the **EARTH**. For example, the stock market is not a resource of the earth even though it is a way to invest money. The stock market is a system of financial gain that was created by men.

It is not a natural resource of the earth. The reason why people lose money in the stock market is because this financial system **DOES NOT** belong to God.

“GOD IS NOT RESPONSIBLE TO BLESS
ANYTHING THAT DOES NOT BELONG TO HIM.”

Everything that belongs to God will always produce a return. **EVERY RESOURCE OF THE EARTH HAS BEEN CREATED TO REPRODUCE AFTER ITSELF.** When you

invest your money toward the resources that belong to God you will always receive a return.

The earth is a reproductive organ. Every resource of the earth was made to multiply and when you invest your money toward these resources your money will multiply in the same way.

HERE'S WHAT I MEAN:

OIL is a natural resource of the earth. Oil produces fuel for cars, brake fluid, household paint, nail polish, life jackets, detergent, shampoo, lipstick, medicines and food wrappers.

Oil also produces hair spray, roads, plastic bags, carpets, toys, fertilizer, eye glasses, explosives, golf balls and so much more. Investing in oil is investing into the Kingdom of God. Everything God creates will always reproduce after itself.

PEOPLE are a natural resource of the earth. People produce babies, ideas, businesses and so much more. In Genesis 2:7, the Lord God took the **DUST FROM THE GROUND** and formed a man, which made us a natural resource of the earth.

We were made to reproduce without God's help. Investing in people is **NOT** the same as investing in their ideas. For instance, when a parent invest their time to raise their children they may not agree with their ideas however, their investment of time is meant to reap their children's loyalty, respect and love.

Investing in people will cause you to reap loyalty, respect, love and friendship. Investing in people is an investment into the Kingdom of God. Everything God creates will always reproduce after itself.

WISDOM NOTE:

People will always produce a return whether negative or positive. However, Godly people will produce a return from God's Kingdom.

METAL is a natural resource of the earth. Metal is used to make tools, build bridges, build buildings and build ships. Metal is also used to make knives, axes, razors, jewelry, screws and so much more.

Investing in metal is the same thing as investing into the Kingdom of God. Everything God creates will always reproduce after itself.

PLANTS are a natural resource of the earth. Plants produce oxygen, carbohydrates from carbon dioxide and water from the process of photosynthesis. Plants are also able to synthesize proteins and fats and produce food in their leaves called chlorophyll.

ANIMALS are a natural resource of the earth. Animals produce food, comfort, dairy products, clothing and shoes. Animals also produce fabric softener because downy fabric softener contains dehydrogenated tallow dimethyl ammonium chloride, which comes from the cattle, sheep and horse industry.

LAND is a natural resource of the earth. Schools can be built on land. Houses can be built on land. Gardens can be grown on land. Businesses can be established on land.

The first gift God gave Adam was land in Genesis 2:8. When you invest your money in land (real-estate) you are investing in the Kingdom of God. I could go on and on but there are many resources that come from the earth.

People invest money for the purpose of building wealth. In order to capitalize on your investment you must remember this wisdom key. Investing in the world's systems can **POSSIBLY** make you rich. However, investing

in the earth's natural resources will **GUARANTEE** you become financially wealthy.

- John D. Rockefeller invested in **OIL** and became one of the world's wealthiest men.
- Andrew Carnegie invested in steel (**METAL**) and became one of the world's wealthiest men.

INVESTING IN THE KINGDOM OF GOD WILL
ALWAYS MAKE YOU WEALTHY!
