

THE DIFFERENCE BETWEEN RICH AND POOR PEOPLE

By: Fountain Hendricks

Proverbs 22:2

There is only **ONE** difference between rich and poor people. You may be thinking, no there isn't. There's many differences. There are many **THINGS** that separate the rich and poor **CLASS** such as houses, cars, jewelry, clothes, etc. However, there is only one distinct difference.

The one distinct thing is **VISION**. Rich people **SEE** differently than poor people. When poor people see trouble, rich people see an opportunity. When poor people see problems, rich people see money.

When poor people see chaos, rich people see leverage.
When poor people see lack, rich people see capitalism.
When poor people see work, rich people see a blessing.

When poor people see change, rich people see a time to grow and evolve. When poor people see money, rich people see investment.

We all have twenty four hours in a day. We are given the same amount of time to make good or bad decisions. What you do with your **TIME** will determine if you end up rich or poor. This is why abundance and lack falls under the umbrella of **MANAGEMENT**.

How you manage your time will determine your condition in life. If you can fix your vision you can fix your financial situation. What you **SEE** determines how you feel, what you pursue and what you believe.

Unfortunately, you may not be able to control what you see in front of you but you can **ALWAYS** control what you see **AHEAD** of you. What's in front of you is what people put before you. What's ahead of you is what God puts in front of you.

WHERE IS YOUR FOCUS?

Proverbs 22:2 says, *"The rich and the poor are alike in that the Lord made them all. The wise see danger ahead and avoid it, but fools keep going and get into trouble."*

The wise see what God put ahead of them. Poor people see what other people put in front of them. If you are tired of struggling financially, **CHANGE YOUR VISION**. Remove yourself from poverty thinking people.

The books you read, the associations you have, the videos you watch, the post you follow on social media, the people you listen to are contributors in shaping your vision. Rich people do not become rich by working hard. They become richer by **EXPANDING** their vision.

The world is transitioning to automation. The people who **SEE** how to take advantage of the uprise of automation will become richer. The individuals who **SEE** automation as a threat will become poor.

If you can only see with your eyes you have sight. However, when you can see with your mind you have vision. Vision is **IMAGINATION**. It is seeing the impossible become possible. When you can imagine what has not been done and move in action to make it happen you will become richer in life.
