

Home Performance Technologies, Inc. (HPT) would like to encourage families to save their energy usage in air conditioning this summer. You will help the planet by reducing your usage of energy and save some money by using less electric.

LIPA has a FREE program available to homeowners with central air conditioning helping them save energy and money. LIPA will send a Home Performance Direct contractor (us) to your home and do an energy audit, seal your air conditioning ducts to make sure all the air conditioning is going to the home and not into the attic AND install up to 15 CFLs (compact fluorescent light bulbs) which uses up to 75% less energy and last 6-10 times longer than incandescent bulbs. HPT would be more than happy to help you take advantage of this program and again, it is FREE to you!

After the audit is done, the contractor will go over other things that can be done in your home to make it more energy efficient saving you money on heating costs for the fall and winter. You will learn what can be done, what the cost is to you, the rebates that are available to you and the savings in energy usage and money you will receive. The contractor will also offer info about low interest financing available to you. And these loan are through LIPA and the amount of the loan will be less than your savings so there is NO cost out of pocket.

If you are looking to install or upgrade your central air conditioning system this year LIPA has a Cool Homes Program offering incentives and rebates to help cover the costs. You can go to LIPA's website for more information. www.lipower.org

For people without central air conditioning: you can still have an energy audit done at NO charge to you to determine what can be done in your home to save energy and money.

Home Performance Technologies, Inc would like to offer anyone who takes advantage of the LIPA Home Performance Direct program or just has an energy audit done a donation of \$50 to the Mt Sinai School PTO on your behalf!

Let's ALL work together to make the planet better for ourselves and our future generations.
