

Cadillac

beautiful boats

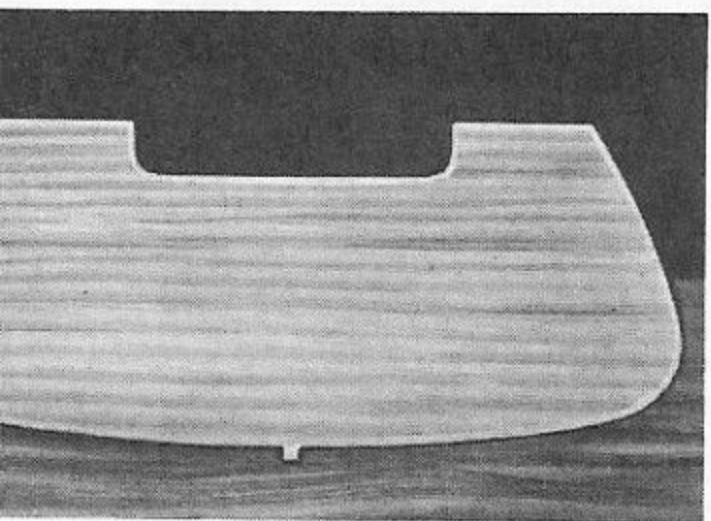

**the finest development
in outboard design!**

Cadillac molded plywood boats are seamless, leak proof . . . extra strong and light . . . real beauties in rich, clear mahogany, with chrome plated brass hardware! The high compression molded hulls are laminated of 5 to 7-ply clear mahogany veneer, resin-bonded, and incorporate curves and contours that permit greater speed and maneuverability with greater safety.

STRONGER, YET LIGHTER!

Cadillac molded plywood hulls need no heavy ribbing and reinforcing members—their high compression molding makes them tougher, more durable without extra weight of reinforcements.

MORE STABLE, SEAWORTHY

Cadillac's broad beam and smoothly rounded bilges make them exceptionally fast, stable and maneuverable. There is no tendency to trip or skid on corners.

The BAR HARBOR

Cadillac's new favorite . . . and the most advanced idea in boating! New molded *"ply-lap" construction has the advantages of lap-strake hulls without the disadvantages. Polished plywood above the spray rail, molded ply-lap below. Ply-lap impedes roll, improves buoyancy, raises speed potential. Smooth plywood interior has no seams to caulk, no grooves to clean. Style A interior has walk-through back on front seat and two other standard seats. Style B interior features walk-through backs on both seats with quarter panels mounted to permit steering from the back seat.
